### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The prior art does not teach, inter alia, the claimed inner bearing cap and charge concentrator positioned between a rotor shaft and an inner end of the bearing cap (claims 1 and 7) or separated from the inner bearing cap by a clearance (claim 16), wherein the charge concentrator comprises a sharp edge. The centrifugal contact point 7 (Fig.3) or 8b (Fig.5) in Shiraishi does not comprise a sharp edge. Further, even if the contact point were considered to have a sharp edge, there is no motivation for use of such a sharp edge in combination with any of the remaining prior art charge concentrating structures. Fisher's motor shaft discharge device includes a brush 24 with a charge concentrator formed by contact tip 40 (Fig.1) in contact with disk portion 36; however, the contact tip is not located between the rotor shaft and an inner end of an inner bearing cap; neither is there motivation to use a sharp edge per Fisher in combination with any of the remaining prior art. Barahia's auxiliary shaft 3 includes a male stub 13 which functions as a means to connect the auxiliary shaft 3 with main shaft 4, not as a charge concentrator (c.3, lines 6-15).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### *Drawings*

2. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because the current drawings are informal. Applicant is advised to employ the

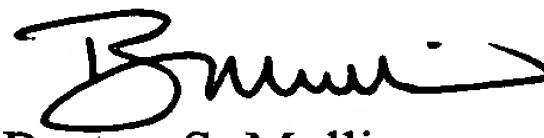

Art Unit: 2834

services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.
